

HYDRAFORM – BLOCK YARD

Producing 2 million blocks per year

HYDRAFORM's operates its own block yard in Johannesburg, South Africa. The block yard, which began as a training facility in 1999, has grown to a full-scale industrial block yard with an annual block production capacity of over 2 million.

HYDRAFORM Block Yard teams with Joseph Semenkane the block yard manager

Most of the block production is currently going into security walling. Hydraform has the advantage of high quality and low cost over other walling systems. With over 20km of walling constructed around Johannesburg, the **HYDRAFORM** building system has become the choice for walling in Johannesburg.
