

The Yellow Brick Machine

Did you know that the **HYDRAFORM** brick machine can be used to make a variety of different blocks and bricks, by changing the mould.

HYDRAFORM recently constructed a dome house using the innovative **HYDRAFORM** splitter brick. The splitter brick is a 3-in-1 brick that is cut after manufacture into 3 Rock Face finish bricks. The bricks, standard imperial size, 75mm x 110mm x 230mm and can be used as a rock finish or as ordinary brick and mortar.
