

Sun City Community Team Build

HYDRAFORM together with Sun City recently ran a community team build for DELL Asia. Over 300 DELL employees and their families, coming from Japan, Australia, China and various other Asian countries, participated in this incredible event. The DELL employees had an opportunity to make the foundation bricks for a local school. The DELL team put a lot of sweat and work into the day, which ended on a positive note and a fantastic opportunity for the local community to get a new computer room for their school.

Well done to the Hydraform team for making this day such a success.
